

FISSION INFOTECH

Data Management Support

Data management can demand a great deal of time, when in actuality, the work can often be performed by outsourced workers for only about one-third the price you are currently paying. Our highly educated workforce is trained in accordance with American business practices, delivering excellent service, reliability and customer service. When they are hired for your assignment, they receive customized training about your business, assigned tasks and overall expectations. And once the job is underway, we carefully monitor our personnel with streamlined lean quality control systems to ensure that they are delivering on our promise.

Tasks we commonly perform in this area include:

Data Entry: Entering data from surveys, mailing lists, and claims; updating customer names and addresses; populating new systems or data fields, and digitizing information from paper forms.

Database Management: Updating customer records, ensuring compliance and monitoring data-driven applications, managing data back-up, recovery and storage operations, and overseeing data security.

Data Analysis: Manipulating data to clean records and ensure that data collection rules are followed, and modeling and reporting on particular subsets of the database, including information about data quality and usefulness.

Data Mining: Evaluating data to uncover unusual trends, clusters or anomalies, managing data sampling and testing, and communicating findings to aid in future data collection operations.

THE COMPANY HAS
GROWN TO MANAGE
ALL TYPES OF COMPLEX
PROJECTS FOR
LEADING U.S.
COMPANIES ON A
DAILY BASIS.**

Fission Infotech provides low-cost data management support to U.S. companies by outsourcing tasks to Indian workers. Located in one of India's largest and most innovative technology hubs, we can replicate many of the data management services you need -- such as data entry, data mining and data analysis -- at a fraction of the cost you're currently paying.

24/7 SUPPORT

At Fission Infotech, we make it easy to outsource your projects. We first conduct a comprehensive intake session to fully understand your company and requirements, and carefully select and train candidates that will perform best for your company. By working with overseas staff, you can save up to two-thirds of your administrative costs, as well as save on infrastructure investments, salaries, benefits, health care and other overhead. We offer the flexibility you need to manage a fluctuating work flow, so you are never paying staff during sustained periods of downtime. Outsourcing is a growing trend in increasingly cut-throat industries to control costs while maintaining quality. Call us or visit our website at www.fissioninfo.tech to learn more about getting into the next wave of productivity growth -- outsourcing.
